Senior Product Designer & Front-end Engineer

Product designer since 2016, including 4 years as the sole designer of a B2B SaaS platform for oncology research. I design complex, data-dense workflows from discovery to delivery, build design systems in Figma and in code, and can ship the front-end myself (React), with AI-assisted tools.

EXPERIENCE

Senior Product Designer & Front-end Engineer / Epigene Labs

Jan 2022 – Apr 2026 · 4 years 4 months · Remote

Biotech startup (15 to 30 people), B2B SaaS platform for exploring and analyzing cancer genomic data. Hired as Front-end Engineer, promoted to Product Designer, then Senior. Sole designer, working with 1 PM, 1 EM, 3 engineers and stakeholders from the scientific and curation teams.

- Led the end-to-end UI/UX redesign of the platform, from an audit presented to the leadership team to delivery, making the user experience a selling point in sales demos
- Redesigned the core analysis-building workflow, then turned it into a reusable pattern to design 2 new analysis types, taking the product from 1 to 3 analyses in production
- Built and maintained the product's first design system (2022–2026) in Figma and React/ReScript
- Introduced user research (interviews, prototype tests, shadowing), then trained the Product Managers, who went on to run 10+ discovery interviews on their own
- Redesigned and built in React the Data Explorer to scale from 2,000 to 20,000+ datasets, shipped 6 weeks after a cross-functional workshop I designed and facilitated
- Designed and built Data Finder, an AI-assisted feature now in production that turns researchers' plain-language requests into ready-to-use filters

Product Designer & Front-end Engineer / Link Value

Dec 2016 – Jan 2022 · 5 years 2 months · Hybrid, Lyon

IT consulting firm, client missions on B2B SaaS products and internal tools, as designer and front-end developer. Sole designer on some missions, alongside other designers on others.

- Led, as the sole Product Designer, the redesign of user flows for a real estate client and property management tool, from user research to shipping the front-end
- Designed and implemented Dawex's insights dashboard, tailored to each client type
- Built the front-end of Arte.tv's design system in React and ReScript

EDUCATION / TRAINING

Design Thinking Training / UX Republic

2017 - 3 days, Paris

Master Expert Digital / Digital Campus

2014 - 2016, Lyon

Apprenticeship in web agency

Professional Degree in Multimedia Communication / JM University Lyon 3

2013 - 2014, Lyon

Apprenticeship in web agency

SKILLS

Design
Complex workflows, Data-dense interfaces, Information architecture, User flows, User-centered design, Prototyping

Research
Product discovery, User research, User interviews, Usability testing, Workshop facilitation

Design systems
Design tokens, Component libraries, Design–code parity, Documentation (Figma, Storybook)

Front-end
React, TypeScript, ReScript, HTML/CSS, D3.js, Responsive web design

Tools
Figma (components, variants, prototyping), FigJam, Miro, Jira, Notion, Adobe Creative Suite

LANGUAGES

French (native), English (fluent)
